Subscription Rates
Annual Institutional Subscription Rates 1996: North, Central and South America, U.S. $1292.00, Rest of the World, £812.00. Associated Personal Subscription Rates are available on request for those whose institutions are library subscribers. Sterling prices exclude VAT. Non-VAT registered customers in the European Community will be charged the appropriate VAT in addition to the price listed. Prices include postage and insurance and are subject to change without notice. Members of the Pattern Recognition Society will receive the journal free of charge as part of their membership to the Society. Subscription enquiries from customers in North America should be sent to: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A., and for the remainder of the world to: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K. Subscription rates for Japan are available on request.

Publishing and Advertising Offices. *American Continent*: Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A. *Rest of the World*: Elsevier Science Ltd, The Boulevard, Langford Lane, Kidlington, Oxford OX5 1GB, U.K.

Back Issues. Back issues of all previously published volumes, in both hard copy and on microform, are available direct from Elsevier Science offices (Oxford and New York). Complete volumes and single issues can be purchased for 1990–1995. Earlier issues are available in high quality photo-duplicated copies as complete volumes only. Back volumes on microfilm are available from UMI, 300 North Zeeb Road, Ann Arbor, MI 48106, U.S.A.

Second-class postage paid at Newark, NJ. Postmaster send address corrections to Pattern Recognition, c/o Elsevier Science Inc., 660 White Plains Road, Tarrytown, NY 10591-5153, U.S.A.

VOLUME CONTENTS

Number 1

R. Close, S. Tamura and H. Naito	1	Estimation of motion from sequential images using integral constraints
S. G. Nadabar and A. K. Jain	11	Fusion of range and intensity images on a Connection Machine (CM-2)
M. Ito and A. Ishii	27	A three-level checkerboard pattern (TCP) projection method for curved surface measurement
L.-K. Huang and M.-J. J. Wang	41	Image thresholding by minimizing the measures of fuzziness
J. Dai	53	Robust estimation of HMM parameters using fuzzy vector quantization and Parzen's window
Z. Chi, J. Wu and H. Yan	59	Handwritten numeral recognition using self-organizing maps and fuzzy rules
Y. Lu	67	Machine printed character segmentation—an overview
E. R. Dougherty and Y. Cheng	81	Morphological pattern-spectrum classification of noisy shapes: exterior granulometries
L. Ganesan and P. Bhattacharyya	99	A statistical design of experiments approach for texture description
S.-C. Pei and J.-H. Horng	107	Fitting digital curve using circular arcs
C.-T. Ho and L.-H. Chen	117	A fast ellipse/circle detector using geometric symmetry
Software Survey Section	I	

Number 2

M. Magee and J. K. Aggarwal	125	Robot self-location using visual reasoning relative to a single target object
N. Itoh	135	Japanese language model based on bigrams and its application to on-line character recognition
A.-J. Hsieh, K.-C. Fan and T.-I. Fan	143	Bipartite weighted matching for on-line handwritten Chinese character recognition
J. Cao, M. Ahmadi and M. Shridhar	153	Recognition of handwritten numerals with multiple feature and multistage classifier

L. Yang, B. K. Widjaja and R. Prasad 161 Application of hidden Markov models for signature verification

D. A. Trytten and M. Tuceryan 171 The construction of labeled line drawings from intensity images

A. Pikaz and I. Dinstein 199 Matching of partially occluded planar curves

D. J. Park, K. M. Nam and R.-H. Park 211 Multiresolution edge detection techniques

J. P. P. Starink and E. Backer 231 Finding point correspondences using simulated annealing

S. Thompson and A. Rosenfeld 241 Isotropic growth on a grid

P. K. Biswas, S. S. Biswas and B. N. Chatterji 255 An SIMD algorithm for range image segmentation

D. P. Mukherjee, A. Pal, S. E. Sarma and D. D. Majumder 269 Water quality analysis: a pattern recognition approach

M. A. Klopotek 283 A comment on "analysis of video image sequences using point and line correspondences"

Call for Papers II

Number 3

Zs. M. Kovács-V. and R. Guerrieri 293 Massively-parallel handwritten character recognition based on the distance transform

K.-C. Fan, C.-K. Lin and K.-S. Chou 303 Confusion set recognition of on-line Chinese characters by artificial intelligence technique

T. Li, Y. Y. Tang and L. Y. Fang 315 A structure-parameter-adaptive (SPA) neural tree for the recognition of large character set

F. Y. Shih and C. C. Pu 331 A skeletonization algorithm by maxima tracking on Euclidean distance transform

R. L. Ogniewicz and O. Kübler 343 Hierarchic Voronoi skeletons

N. Kiryati and O. Kübler 361 Chain code probabilities and optimal length estimators for digitized three-dimensional curves

A. Pikaz and I. Dinstein 373 Optimal polygonal approximation of digital curves

J. C. Bezdek and N. R. Pal 381 An index of topological preservation for feature extraction

D. B. Lysak Jr, P. M. Devaux and R. Kasturi 393 View labeling for automated interpretation of engineering drawings

C.-Y. Huang and K.-L. Chung 409 Fast operations on binary images using interpolation-based bintrees

J. B. Roseborough and H. Murase 421 Partial eigenvalue decomposition for large image sets using run-length encoding

P. Dani and S. Chaudhuri 431 Automated assembling of images: image montage preparation

S.-W. Shih, Y.-P. Hung and W.-S. Lin 447 When should we consider lens distortion in camera calibration

K. Zhang 463 Algorithms for the constrained editing distance between ordered labeled trees and related problems

Number 4

M. Kobashi and L. G. Shapiro 475 Knowledge-based organ identification from CT images

J.-Y. Lin and Z. Chen 493 A Chinese-character thinning algorithm based on global features and contour information

Q. Huo and C. Chan 513 Contextual vector quantization for speech recognition with discrete Hidden Markov Model

S. S. Iyengar and W. Deng 519 An efficient edge detection algorithm using relaxation labeling technique

Y. Q. Chen, M. S. Nixon and D. W. Thomas 537 Statistical geometrical features for texture classification

X. Y. Jiang and H. Bunke 553 Line segment based axial motion stereo

C.-C. Chang and C.-F. Lee 563 Relative coordinates oriented symbolic string for spatial relationship retrieval

S. Loncaric and A. P. Dhawan 571 Near-optimal MST-based shape description using genetic algorithm

M. A. Abou-Nasr and M. A. Sid-Ahmed 581 Fast learning and efficient memory utilization with a prototype based neural classifier

M. Miyojim and H.-D. Cheng 595 Synthesized images for pattern recognition

Number 5

A. A. Farag and E. J. Delp 611 Edge linking by sequential search

J. Yuan and C. Y. Suen 635 An optimal O(n) algorithm for identifying line segments from a sequence of chain codes

R.-C. Lo and W.-H. Tsai 647 Gray-scale Hough transform for thick line detection in gray-scale images

Y. C. Cheng and S. C. Lee 663 A new method for quadratic curve detection using K-RANSAC with acceleration techniques

S. Urago, J. Zerubia and M. Berthod 683 A Markovian model for contour grouping

P. Schroeter and J. Bigün 695 Hierarchical image segmentation by multi-dimensional clustering and orientation-adaptive boundary refinement

S. Ghosal and R. Mehrotra 711 Range surface characterization and segmentation using neural networks

B. J. Super and A. C. Bovik 729 Planar surface orientation from texture spatial frequencies

F. Rhodes 745 On the metrics of Chaudhuri, Murthy and Chaudhuri

A. R. Webb 753 Multidimensional scaling by iterative majorization using radial basis functions

K. Urahama and Y. Furukawa 761 Gradient descent learning of nearest neighbor classifiers with outlier rejection

P. Bhattacharya and A. Rosenfeld 769 Polygonal ribbons in two and three dimensions

G. Celeux and G. Govaert 781 Gaussian parsimonious clustering models

Number 6

W.-Y. Chen, Y.-F. Liao and S.-H. Chen 795 Speech recognition with hierarchical recurrent neural networks

Y. A. Dimitriadis and J. L. Coronado 807 Towards an art based mathematical editor, that uses on-line handwritten symbol recognition

G. Ritter, M. T. Gallegos and K. Gaggermeier 823 Automatic context-sensitive karyotyping of human chromosomes based on elliptically symmetric statistical distributions

R. Brunelli and S. Messelodi 833 Robust estimation of correlation with applications to computer vision

J. Koplowitz and S. Plante 843 Corner detection for chain coded curves

C.-H. Chen, J.-S. Lee and Y.-N. Sun 853 Wavelet transformation for gray-level corner detection

J.-M. Chen and J. A. Ventura 863 Optimization models for shape matching of nonconvex polygons

P.-F. Yang and P. Maragos 879 Min–max classifiers: learnability, design and application

L. Cinque, S. Levialdi and A. Rosenfeld 901 Fast pyramidal algorithms for image thresholding

P. F. M. Nacken 907 Image segmentation by connectivity preserving relinking in hierarchical graph structures

A. Ruiz 921 A nonparametric bound for the Bayes Error

Call for Papers I

Number 7

M. Jordan and J.-P. Cocquerez 931 Three-dimensional description of scenes observed in aerial photography

M. Narasimha Murty and A. K. Jain 949 Knowledge-based clustering scheme for collection management and retrieval of library books

M. Vairy and Y. V. Venkatesh 965 Deblurring Gaussian blur using a wavelet array transform

C. Colombo, A. Del Bimbo and S. Santini 977 Optical flow by nonlinear relaxation

D. Liu, Y. Yamashita and H. Ogawa 989 Pattern recognition in the presence of noise

P. N. Suganthan, E. K. Teoh and D. P. Mital 997 Pattern recognition by graph matching using the Potts MFT neural networks

L. Devroye and G. Lugosi 1011 Lower bounds in pattern recognition and learning

L. P. Gewali 1019 Recognizing S-star polygons

J. E. Cryer, P.-S. Tsai and M. Shah 1033 Integration of shape from shading and stereo

H. Nishida 1045 Curve description based on directional features and quasi-convexity/concavity

E. Tanaka 1053 Theoretical aspects of syntactic pattern recognition

F. Morii 1063 An image thresholding method using a minimum weighted squared-distortion criterion

S. Thayer and M. Trivedi 1073 Residual uncertainty in three-dimensional reconstruction using two-planes calibration and stereo methods

J. Moh and F. Y. Shih 1083 A general purpose model for image operations based on multilayer perceptons

C. L. Sabharwal and S. K. Bhatia 1091 Perfect hash table algorithm for image databases using negative associated values

Number 8

S. Krishnan and D. Raviv 1103 2D feature tracking algorithm for motion analysis

S. Venkatesh, J. Cooper and B. White 1127 Local energy and pre-envelope

I. Hannah, D. Patel and R. Davies 1135 The use of variance and entropic thresholding methods for image segmentation

K. Xin, K. B. Lim and G. S. Hong 1145 A scale-space filtering approach for visual feature extraction

J. Shen and W. Shen 1159 Image smoothing and edge detection by Hermite integration

X. Li and N. Roeder 1167 Face contour extraction from front-view images

Y.-L. Chang and J. K. Aggarwal 1181 Representing and estimating 3-D lines

L. Latecki, A. Rosenfeld and R. Silverman 1191 Generalized convexity: CP_3 and boundaries of convex sets

A. Hilton, J. Illingworth and T. Windeatt 1201 Statistics of surface curvature estimates

J.-S. Park and S.-W. Lee 1223 Adaptive nonlinear shape matching for unconstrained handwritten character recognition

P. Wunsch and A. F. Laine 1237 Wavelet descriptors for multiresolution recognition of handprinted characters

Q. Hu, J. Yang, Q. Zhang K. Liu and X. Shen 1251 An automatic seal imprint verification approach

L. Wang and D. L. Alkon 1267 An artificial neural network system for temporal–spatial sequence processing

K. C. Gowda and T. V. Ravi 1277 Divisive clustering of symbolic objects using the concepts of both similarity and dissimilarity

Number 9

T. N. Tan 1283 Texture edge detection by modelling visual cortical channels

H. H. S. Ip and S. W. C. Lam 1299 Three-dimensional structural texture modeling and segmentation

T. E. Dufresne and A. P. Dhawan 1321 Chord–Tangent Transformation for object recognition

Z. Xiaoqi and Y. Baozong 1333 Shape description and recognition using the high order morphological pattern spectrum

I. Bloch and H. Maître 1341 Fuzzy mathematical morphologies: a comparative study

P. Pudil, J. Novovičová, N. Choakjarernwanit and J. Kittler 1389 Feature selection based on the approximation of class densities by finite mixtures of special type

H. Bunke, M. Roth and E. G. Schukat-Talamazzini 1399 Off-line cursive handwriting recognition using hidden Markov models

K. H. Fielding and D. W. Ruck 1415 Recognition of moving light displays using hidden Markov models

W.-G. Lin and S.-S. Wang 1423 A modified S neuron and its application to scale-invariant classification

R. Mukundan and K. R. Ramakrishnan 1433 Fast computation of Legendre and Zernike moments

K. S. Al-Sultan 1443 A tabu search approach to the clustering problem

Number 10

ADAPTIVE INTELLIGENT ENERGY SYSTEMS CONFERENCE

Guest Editor: Shuhei Aida

S. Aida 1453 Preface

S. Aida 1455 An introduction to ecotechnology and its application to the AIES project

A. Mathis 1459 New methodologies and technologies for the intelligent use of energy in industrial and civil applications

B. Caudana, F. Conti, G. Helcke and R. Pagani 1467 A prototype expert system for large scale energy auditing in buildings

W. J. Batty 1477 The development of interactive strategic design environments

K. H. Yang and R. L. Hwang 1483 Energy conservation of buildings in Taiwan

J.-Y. Boivin 1493 Demand side management—the role of the power utility

S. R. Lockley and M. Sun 1499 The development of a design tool

L. Marzio 1507 A new utility–user interface for a qualified energy consumption

K. Hagino and H. Onishi 1517 Control systems for AIES

Research Papers

Y. Zhong, K. Karu and A. K. Jain 1523 Locating text in complex color images

A. Elnagar and A. Basu 1537 Motion detection using background constraints

T. S. Newman and A. K. Jain 1555 A system for 3D CAD-based inspection using range images

P. J. Tadrous 1575 A simple and sensitive method for directional edge detection in noisy images

L. Gupta, T. Sortrakul, A. Charles and P. Kisatsky 1587 Robust automatic target recognition using a localized boundary representation

J. W. Snell, M. B. Merickel, J. M. Ortega, J. C. Goble, J. R. Brookeman and N. F. Kassell 1599 Model-based boundary estimation of complex objects using hierarchical active surface templates

H. Nishida 1611 A structural model of shape deformation

N. Tsumura, K. Itoh and Y. Ichioka 1621 Reliable classification by double hyperspheres in pattern vector space

L. Gupta and R. Tammana 1627 A discrepancy measure for improved clustering

Number 11

K. Sugihara 1635 A graph-theoretical method for monitoring concept formation

R. S. Poulsen and I. Pedron 1645 Region of interest finding in reduced resolution colour imagery—application to cancer cell detection

N. K. Ratha, S. Chen and A. K. Jain 1657 Adaptive flow orientation-based feature extraction in fingerprint images

B. Lerner, H. Guterman, I. Dinstein and Y. Romem 1673 Medial axis transform-based features and a neural network for human chromosome classification

Zs. M. Kovács-V. 1685 A novel architecture for high quality hand-printed character recognition

S.-C. Oh, J.-Y. Ha and J.-H. Kim 1693 Context dependent search in interconnected hidden Markov model for unconstrained handwriting recognition

Q. Chen and J. Y. S. Luh 1705 Relaxation labeling algorithm for information integration and its convergence

J. Flusser, T. Suk and S. Saic 1723 Image features invariant with respect to blur

R. K. K. Yip, P. K. S. Tam and D. N. K. Leung 1733 Modification of Hough transform for object recognition using a 2-dimensional array

D. Luo, P. Smart and J. E. S. Macleod 1745 Circular Hough Transform for roundness measurement of objects

C.-H. Lee and A. Joshi 1751 On correspondence line tokens and missing tokens

B. K. Ray and K. S. Ray 1765 Corner detection using iterative Gaussian smoothing with constant window size

D. Wang, V. Haese-Coat and J. Ronsin 1783 Shape decomposition and representation using a recursive morphological operation

MECHATRONICS

Mechanics - Electronics - Control

An International Journal

Editors-in-Chief: **R.W. Daniel**, *Department of Engineering Science, University of Oxford, Oxford, UK* and **J.R. Hewit**, *Department of Applied Physics Electronics and Manufacturing Engineering, University of Dundee, Dundee DD1 4HN, Scotland*

Audience: Practising engineers both in industry and academia who are involved in the design and/or manufacture of products using computer controlled mechanisms or electromechanical systems.

AIMS AND SCOPE
Mechatronics is the synergistic combination of precision mechanical engineering, electronic control and systems thinking in the design of products and manufacturing processes. It is a relatively new concept relating to the design of systems, devices and products aimed at achieving an optimal balance between basic mechanical structure and its overall control.The purpose of this journal is to provide rapid publication of topical papers featuring practical developments in mechatronics. It will cover a wide range of application areas including consumer product design, instrumentation, manufacturing methods, computer integration and process and device control, and will attract a readership from across the industrial and academic research spectrum.Particular importance will be attached to aspects of innovation in mechatronics design philosophy which illustrate the benefits obtainable by an *a priori* integration of functionality with embedded microprocessor control. A major item will be the design of machines, devices and systems possessing a degree of computer based intelligence. The journal seeks to publish research progress in this field with an emphasis on the applied rather than the theoretical. It will also serve the dual role of bringing greater recognition to this important area of engineering.

A Selection of Papers
N.J.C. STRACHAN (UK), Sea trials of a computer vision based fish species sorting and size grading machine.
J.Y. HUNG (USA), Torque ripple minimization for variable reluctance motors.
K.C. KOH, H.S. CHO (Korea), A path tracking control system for autonomous mobile robots: an experimental investigation.
A. PREUMONT (Belgium), An investigation of the kinematic control of a six-legged walking robot.
R. IKEURA, M. KIMURA, H. INOOKA, T. KAMIJIMA (Japan), Motion planning for computer controlled automata.
C. ZIELIŃSKI (Poland), Reaction based robot control.
P. VÄHÄ, T. HEIKKILA, J. RÖNING, J. OKKONEN (Finland), Machine of the future: an intelligent paper roll manipulator.
O.H. CHAI, Y.S. WONG, A.N. POO (Singapore), A DDA parabolic interpolator for computer numerical control of machine tools.
P.M. HAGELIN, J.R. HEWIT (UK), Artificial neural networks for locating eyes in facial images.
J. TARAMAA, R. LINTULAMPI, V. SEPPÄNEN (Finland), Automated assembly of machine control software.

ABSTRACTED/INDEXED IN: *Science Citation Index, Scisearch, Research Alert, Compumath Citation Index, Current Contents/Engineering, Technology, & Applied Sciences.*

1995: Volume 5 (8 issues)
Personal price: **£50.00 (US$75.00)**

NEURAL NETWORKS

The Official Journal of the International Neural Network Society, European Neural Network Society & Japanese Neural Network Society

Co-Editors-in-Chief: **Stephen Grossberg**, *Boston University, Department of Cognitive and Neural Systems, 111 Cummington Street, Boston, MA 02215, USA*, **Mitsuo Kawato**, *ATR Human Information Processing Research Laboratories, 2-2 Hikaridai, Seika-cho Soraku-gun, Kyoto 619-02, Japan* and **John Taylor**, *King's College London, Department of Mathematics, University of London, The Strand, London WC2R 2LS, UK*
Current Events Editor: **Paul Bakker**, *Intelligent Systems Division, Electrotechnical Laboratory, 1-1-4 Umezono, Tsukuba, Ibaraki 305, Japan*
Action Editor and Co-Editor of Newsletter: **Marwan Jabri**, *University of Sydney, Department of Electrical Engineering, Building J03, NSW 2006, Australia*

Audience: Computer scientists, AI developers, electronic engineers, neuroscientists and psychologists.

AIMS AND SCOPE
Neural Networks is an international journal appearing nine times each year that publishes original research and review articles concerned with the modelling of brain and behavioral processes and the application of these models to computer and related technologies. Models aimed at the explanation and prediction of biological data and models aimed at the solution of technological problems are both solicited, as are mathematical and computational analyses of both types of models. *Neural Networks* serves as a central, interdisciplinary publication for all researchers in the field and its editors represent a range of fields including psycology, neurobiology, mathematics, physics, computer science, and engineering.

A Selection of Papers
YASUHIRO WADA, MITSUO KAWATO (Japan), A neural network model for arm trajectory formation using forward and inverse dynamics models.
S. GROSSBERG (USA), A solution of the figure-ground problem for biological vision.
YAN QIU CHEN, D.W. THOMAS, M.S. NIXON (UK), Generating-shrinking algorithm for learning arbitrary classification.
P. THIRAN, M. HASLER (Switzerland), Self-organization of a one-dimensional Kohonen network with quantized weights and inputs.
M.E. HASSELMO (USA), Runaway synaptic modification in models of cortex: implications for Alzheimer's disease.
Y. YAMAGUCHI, H. SHIMIZU (Japan), Pattern recognition with figure-ground separation by generation of coherent oscillations.
R. BRUNELLI (Italy), Training neural nets through stochastic minimization.
G.A. CARPENTER (USA), A distributed outstar network for spatial pattern learning.
M.W. HIRSCH (USA), Saturation at high gain in discrete time recurrent networks.
A.-J. ANNEMA, K. HOEN, H. WALLINGA (The Netherlands), Learning behavior and temporary minima of two-layer neural networks.
HIROAKI GOMI, MITSUO KAWATO (Japan), Recognition of manipulated objects by motor learning with modular architecture networks.

ABSTRACTED/INDEXED IN: *Artificial Intelligence Abstracts, BIOSIS Database, Bioengineering Abstracts, CABS, CMCI, Cambridge Science Abstracts, Current Contents Science Citation Index, Current Contents/Engineering, Computing and Technology, Information Science Abstracts, Operations Research/Management Science.*

1995: Volume 8 (9 issues)
Associated Personal price: **£103.00 (US$154.00)**
Subscription price: **£400.00 (US$596.00)**
